REACH

Dear Ms. Olander,

omniTECHNIK Mikroverkapselungs GmbH is aware of the REACH-Regulation that came in force in June 2007 and everything is being done to implement REACH in our company. omniTECHNIK Mikroverkapselungs GmbH has the role of a supplier with regard to your company and the role of a downstream user towards our own material suppliers. Under REACH only raw materials can be registered, not formulations. As a result we are therefore not able to register our finished products. We do however completely fulfill our obligations by supplying all relevant information. We are in constant contact with our suppliers concerning the status of the pre-registration and registration of the raw materials we use. The pre-registration ended on December 1st 2008. Currently we have the confirmation by our suppliers that all applicable raw materials are **pre**registered. We expect that the raw materials also will be registered and subsequently approved for their respective applications. Furthermore our products do not contain any „Substances of Very High Concern“ from the „Candidate List“.

We confidently predict that the full precote product range can continue being supplied as before without interruption or modification.

Please do not hesitate to contact me if you have any further questions.

Yours sincerely,

Dr. Karin Lüdtke
